Mission Statement

“Striving for success is my life - respect is my philosophy. I have walked in different shoes, in different countries. Art and photography have always been a main interest, especially when I retired from publishing. I concentrated on digital photography and its transformation to new looks that please the artistic eye.”

“I hope I can make a difference.” Manfred Behr

As a commercial artist, Manfred Behr was introduced to photography in his late teens, and from there on cameras accompanied him throughout his whole life. Having lived in Europe for forty years in different countries, Manfred traveled from Sicily to the northern tundra of Finland. His professional highlight was in 1973, when his company was honored with two awards (Bundespreis fuer gute Form) from the German Ministry of Economy, for outstanding furniture designs. Looking for new adventures, Manfred and family moved to Western Canada, thirty years ago. On several trips across Canada, down to Key West and back through the desert states, Manfred found amazing scenes of Mother Nature. Sixteen years ago, the family moved to Florida, where the family published a glossy travel magazine for eleven years. As an illustrator and photographer, it was a great opportunity for him to travel and see the beauty of the States through the lens of his camera. Manfred received an 1997 American Advertising Award, and was a nominee of the 2004 "Angels of the Arts" award. In 1998, Manfred was honored by receiving the "Florida Finest" award for exceptional achievements from the late Governor Lawton Chiles.
